HOW TO SOLVE SUDOKU

This book uses 9 × 9 grids at Easy, Medium, Hard levels. Fill every row, column, and bold box with each number exactly once. Start with naked singles (a cell with one candidate) and hidden singles (a number with one possible place in a unit). When singles run out, pencil in candidates: naked pairs reserve two digits in two cells, while hidden pairs reveal two digits confined to the same two cells. Eliminate candidates and repeat; every puzzle in this book is solvable by logic without guessing.
